

Configuring BYOD Wi-Fi and Proxy Settings

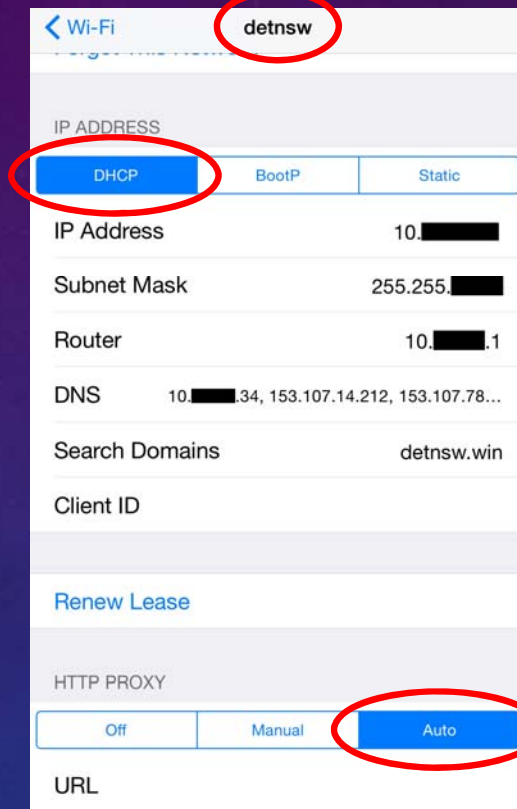

Windows / Internet Explorer

Tools...Internet Options...Connections...LAN Settings

Apple iOS

Settings...Wi-Fi...detnsw

Android

Settings...Wi-Fi...detnsw...
Manage Network Settings

GENERAL STEPS:

1. Connect to  **detnsw** OR  **nswdet** – (forget and recreate if you are having problems connecting)
2. Authenticate to the WiFi using **first.lastname@detnsw** with your password (your portal ID)
3. Configure the proxy settings as described above
4. When prompted to authenticate for Internet access, use **first.lastname@detnsw** with your password

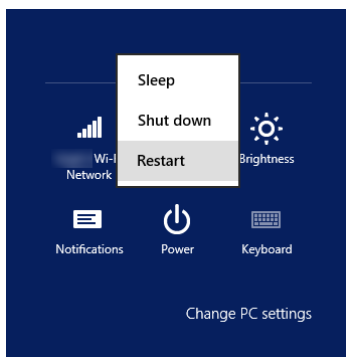

NOTE: If your device does not support auto-config, you can set **Manual** proxy using *proxy.det.nsw.edu.au* on Port 8080

Problem authenticating with your Windows BYOD?

If you are connected to the school's Wi-Fi but aren't asked to authenticate for Internet access, try these steps one at a time and test again. **If it works, stop.** If not, try the next step.

When did you last RESTART?

Windows 8.1

Windows 10

Install all Important and Critical Updates

Settings...Update & Security

Check for updates and install them

It is **essential** that **all of the important updates** for **Windows 8.1** and **Windows 10** be applied.

But please take note that access to Windows Update is **blocked in school from 9am to 3pm** so apply them outside these hours or at home.

If 'Auto Detect Settings' won't work

Windows / Internet Explorer Tools...Internet Options...Connections...LAN Settings
